Course overview & objectives

Business case methodology

Group cases presentation

**The CEO of Deliveroo France calls you:
growth has been stagnant for 12
months. What should be done?**

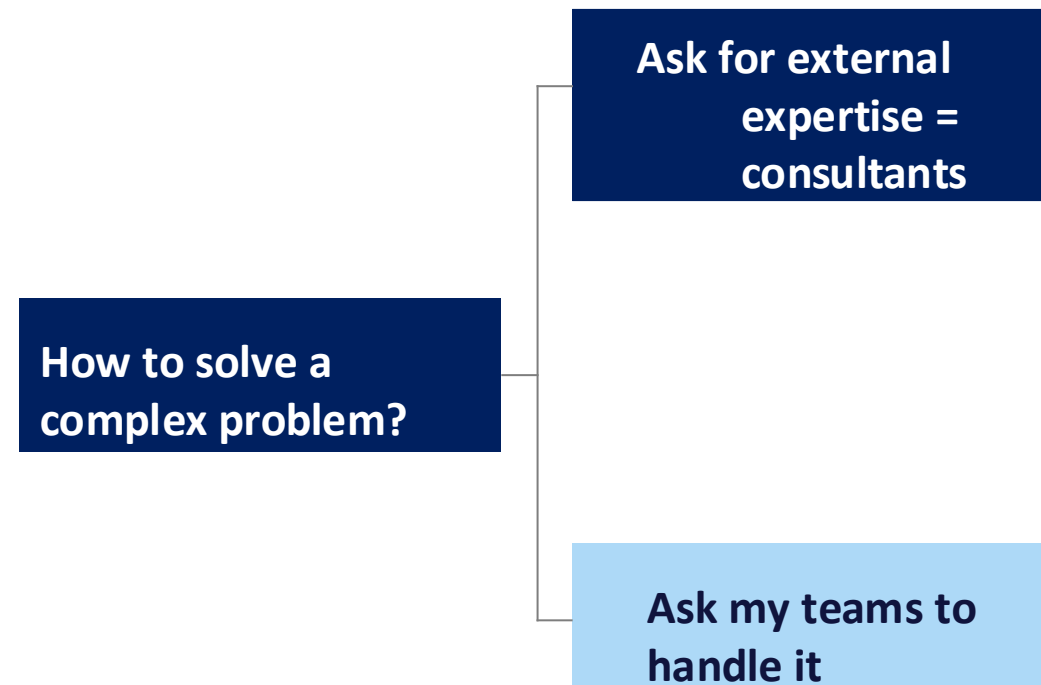

What is business strategy consulting?

Share words or expressions
that comes to your mind related to
business strategy consulting

But what is Stíategy Consulting?

It's a bit like **General Practitioners for CEOs**: an unbiased perspective to solve their problem.

A very (too?) broad scope of intervention:

- | | |
|---------------------------|-------------------------------------|
| Growth, Marketing & Sales | People & Organizational Performance |
| Implementation | Risk & Resilience |
| M&A | Strategy & Corporate Finance |
| Digital | Sustainability |
| Operations | Transformation |

A few names to keep in mind

McKinsey
& Company

BCG BOSTON
CONSULTING
GROUP

BAIN & COMPANY

Consulting | What is it?

Consulting supporting an organization to solve a complex problem or seize an opportunity by providing:

- an **external and objective** perspective,
- a structured **methodology**,
- actionable **recommendations**.

Why consulting methodology is useful everywhere

- **Structure thinking** → break down a problem into clear steps (Issue Tree, MECE).
- **Analyze rigorously** → data collection, benchmarking, diagnosis.
- **Propose options** → scenarios, pros & cons.
- **Recommend & convince** → clear synthesis, visual storytelling.
- **Act & follow up** → roadmap, KPIs, quick wins.

IMPORTANT

Consulting methodology in strategy is **not limited to consulting firms**: it is a **universal toolbox** to solve any complex problem (in business, studies, innovation, startup or even personal life).

Consulting | Landscape

- **Main categories of firm**
 - **Strategy Consulting (MBB)**: McKinsey, BCG, Bain → high-level strategic advice for Boards & CEOs, growth, corporate strategy, M&A.
 - **Audit & Advisory (Big 4)**: Deloitte, EY, PwC, KPMG → audit, finance, risk management, organization, transformation (increasing overlap with strategy).
 - **Technology & IT Services (ESN/SSII)**: Accenture, Capgemini, Sopra Steria → IT integration, outsourcing, digital transformation, large-scale systems delivery.
 - **Specialized Boutiques**: Accuracy, Kea Partners, Alvarez & Marsall
- **Current Industry Trends**
 - **Digital & Data**: AI (Mister AI), digital transformation (Kea Euclid), automation, cybersecurity (I-Tracing), analytics.
 - **Sustainability & ESG**: climate strategy (Carbone 4), energy transition, ESG reporting, responsible growth.

Business problems to tackle can be found in everyday business press

Market Study

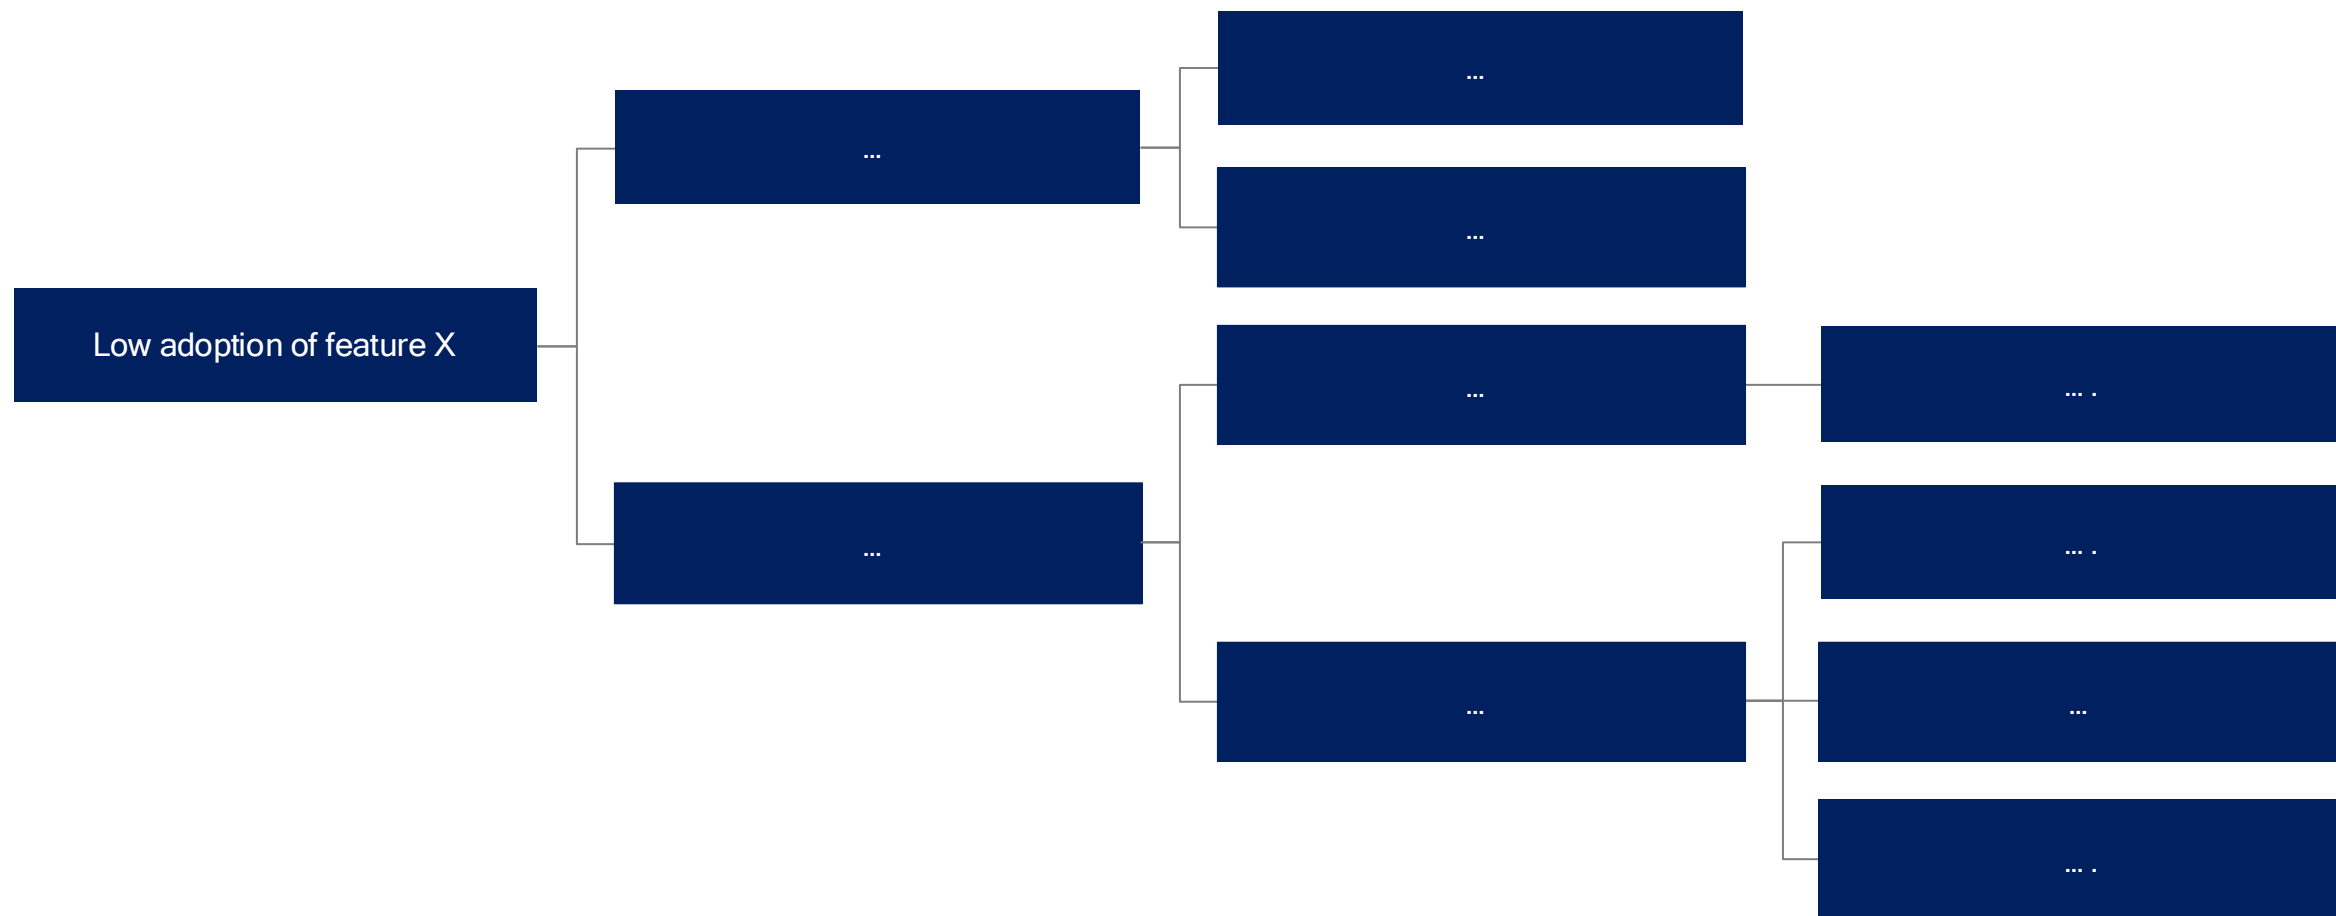

7 steps of problem solving

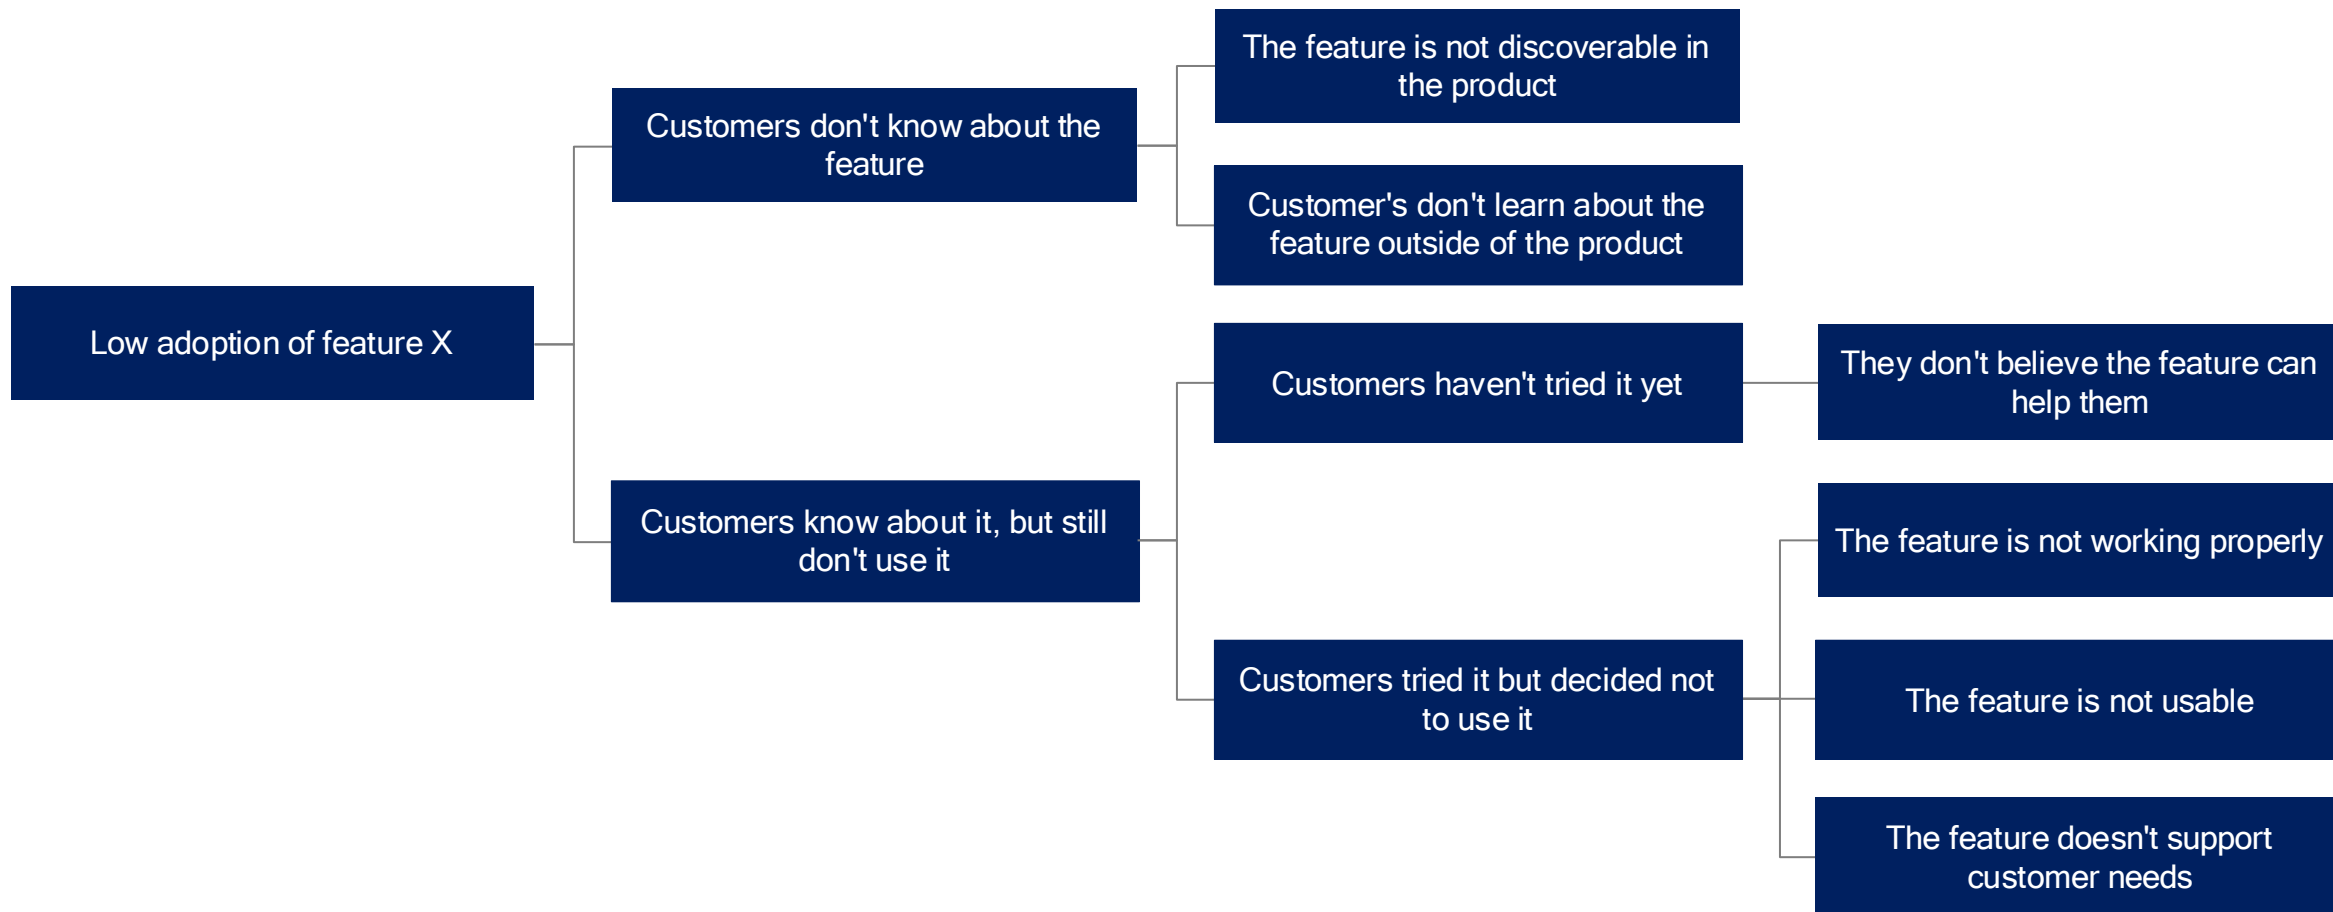

2. A complex problem can be structured & divided into multiple, simpler sub-issues with an issue tree

2: Your turn structuring the problem

2: Your turn structuring the problem

2: Issue trees can be much more complex in real projects

4&5. Quantitative analyses start by putting a problem or question in equation, before diving into figures & computations

How many hairdressers are there in Paris?

4&5. Definition of the problem

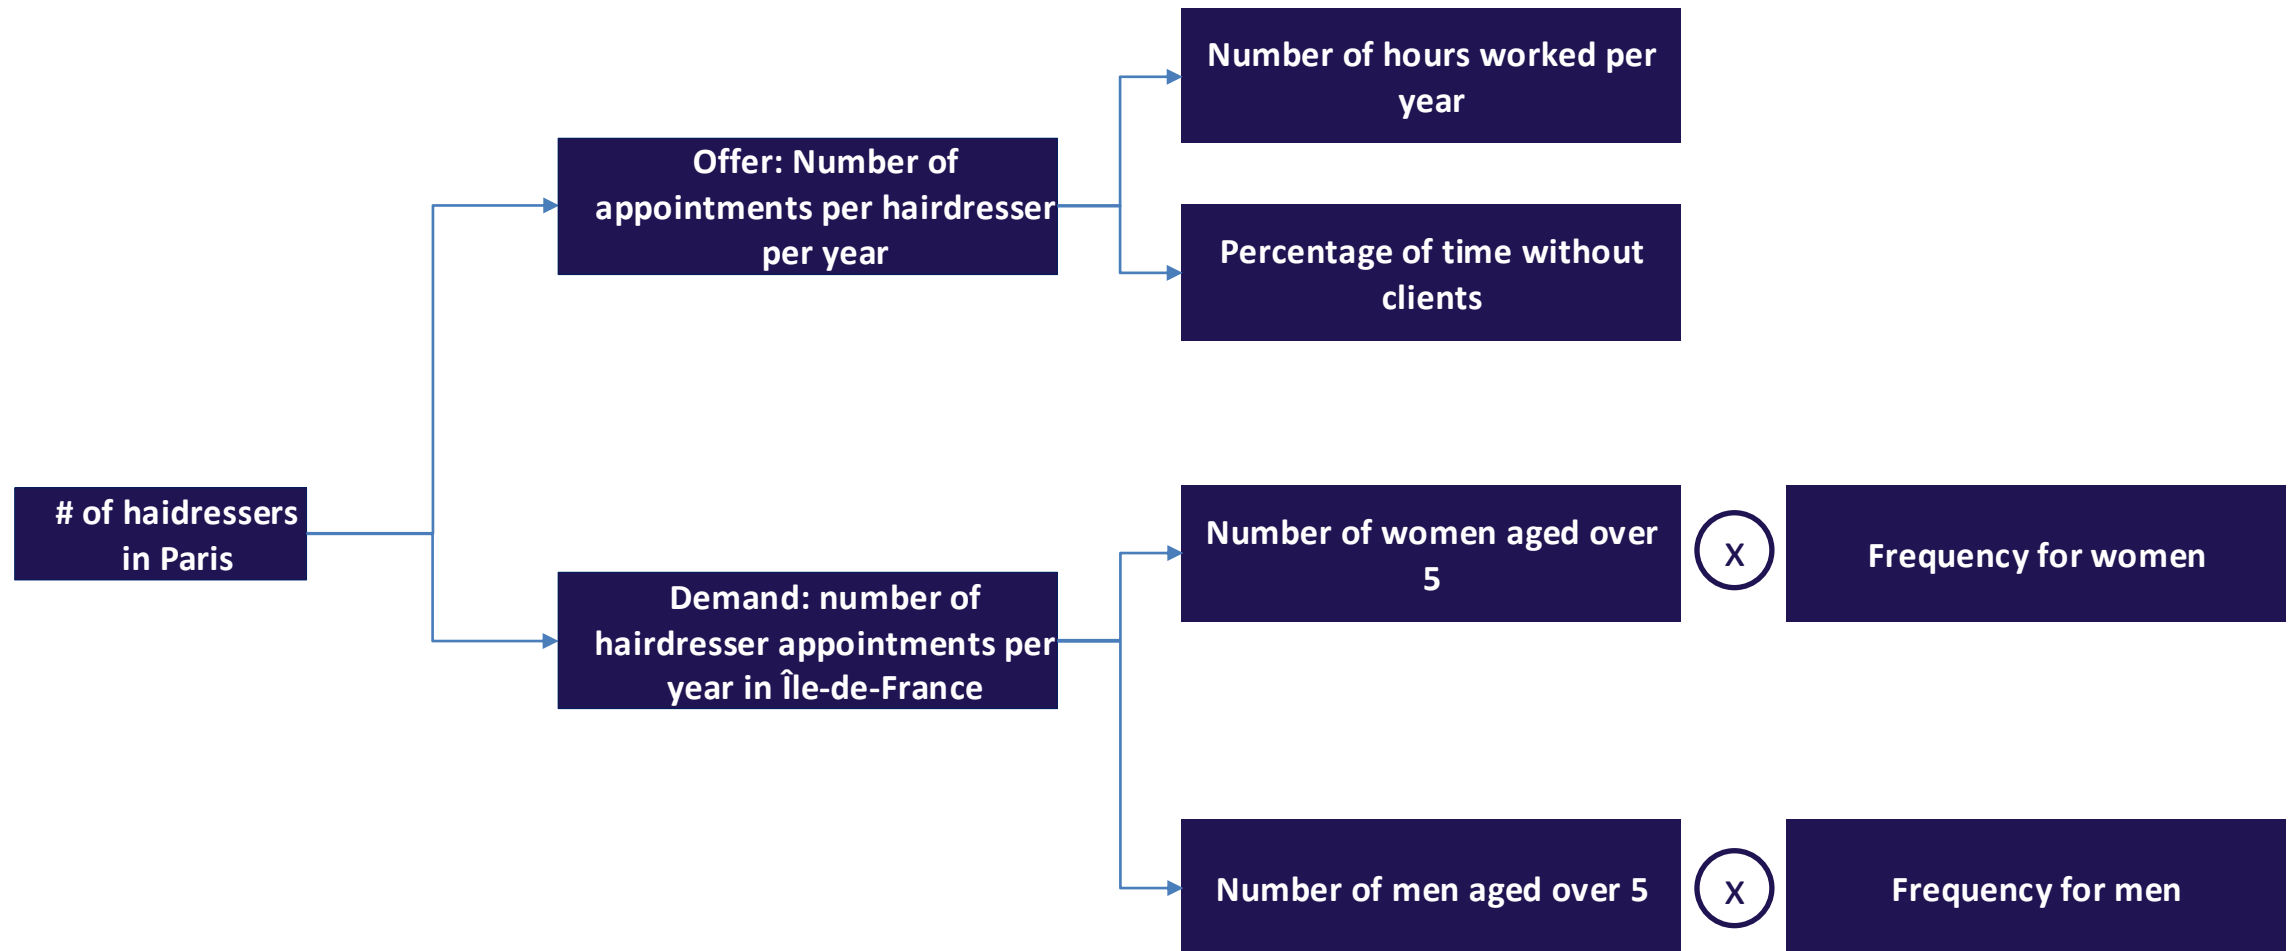

1.

Hairdressers: are we talking about hair salons, or individual hairdressers?

2.

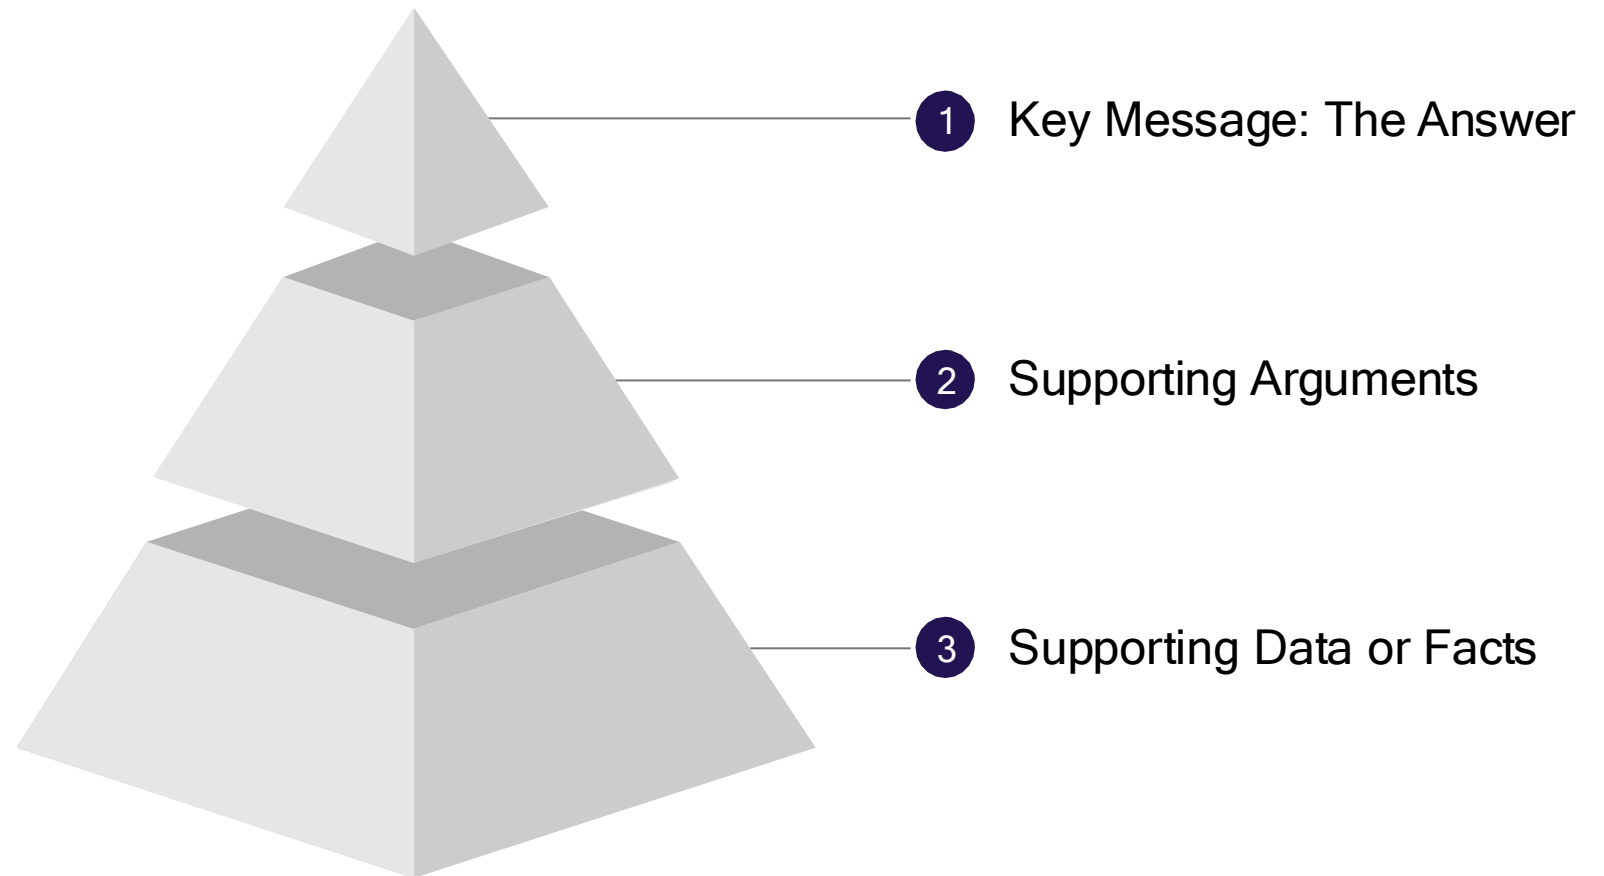

**What is the scope of “Paris”?
Does it refer to Paris proper (intra-muros) or the Île-de-France region?**

4&5: Your turn structuring the problem

5. When synthesizing findings, following a top-down communication is critical to help the client/audience follow

The Minto Pyramid Principle
